We offer a variety of services which make our injection molding plant increasingly competitive. Our wide range of equipment allows us to produce parts as small as 1/32 of an inch up to 6 oz. per shot. Molded Products can competitively produce miniature parts for the electronic/computer industry as well as mold the larger parts required in the hydraulic, agricultural, oil field and automotive industries.

Services Available:

- Design Assistance
- Assembly
- Tool Making
- Custom Packaging
- Production CNC Machining
- Sonic Welding
- Secondary Machine Operations
- Custom Injection Molding
- Insert Molding
- Hot Stamping
- Fabrication & Welding

Molded Products maintains a complete tooling facility for moldmaking. We specialize in high precision molding and secondary machining. We have the unique ability to design and produce plastic parts with very short lead times and low tooling costs. By utilizing state of the art technology for design, we have the ability to produce product not only from a blueprint but also from a model or sample. This technique allows for design flexibility, elimination of costly errors and a reduction in time to market. We can also provide expertise in the latest engineered plastics that offer greater strength, chemical and wear resistance than traditional plastics.

In-process and final inspections are conducted on each product lot manufactured. This constant attention to quality control further insures that the customer's requirements are continually being met and adhered to.

Molded Products is a leading manufacturer of high-quality injection molded products. We utilize various sizes of injection molding machines as well as an excellent group of experienced toolmakers. When the 21-injection molding machines are at full production, they can produce up to 50 million parts per month.

Experience and Knowledge

Our machine shop specializes in machining complex shaped parts that require innovative tooling and fixturing. We hold very close tolerances in difficult to machine materials.

We excel at finding affordable solutions to your challenging and complex problems.

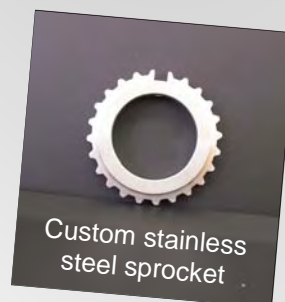

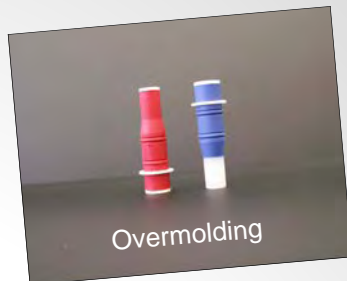

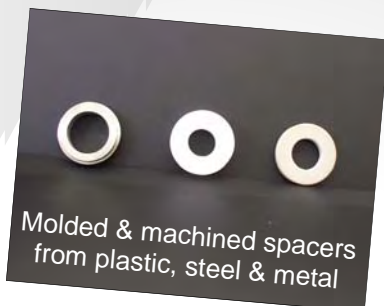

Exotic materials are not a problem!

We are experienced and equipped to handle virtually all types of materials including:

- PVDF
- Polycarbonate
- Stainless Steel
- Polyethylene
- Acrylic
- Santoprene
- Nylon
- Polypropylene
- Ryton
- Polysulfone
- Valox
- Aluminum
- PFA
- ABS
- UHMW
- PVC
- Brass

Machine Capabilities

- Vertical Machine Centers
- CNC Mills
- 4-axis CNC Mill
- Mori Seiki Turning Centers
- CNC Tool Room Lathes
- 4-axis Wire EDM
- CNC Sinker EDM

We are committed to high quality products, affordable pricing and on time delivery.

Contact one of our knowledgeable representatives today to see how we can help reduce your cost and time to market.
