Dear Valued Customer,

Molded Products takes great pride in maintaining a reputation of excellence, enhancing customer satisfaction and continually striving to provide high quality products to the medical industry.

Like many other medical device manufacturers, over the last several months Molded Products has begun implementing UDI labeling onto the packages of our Class II devices in accordance with the FDA's guidance requiring the implementation of the Unique Device Identification (UDI) system.

Implementation of the UDI began with the labels of our Class II devices that were manufactured after September 24, 2016. Changes to the labeling included the addition of the lot number and the expiration date on each individual package in both human- and machine-readable form.

The implementation of the Unique Device Identification system will offer a number of benefits such as quick identification of device expiration dates, improved tracking with lot number identification on each individual package, improved patient safety, and enhanced device post market surveillance.

Throughout this process, we have also experienced changes to our unit of sale and case quantities. Please reference the following chart to see how the new packaging configurations will affect the products you purchase.

*once current inventory is depleted

Please note that as our inventory depletes and we begin to manufacture new lots of product with UDI for the first time, we may experience additional changes to our unit of sale and case packaging.

We appreciate your business and will always find ways to provide you with the highest quality products. We wish to thank you for your valued account, know that you will understand the necessity for the packaging change, and appreciate your patience during this transition.

If you have any questions regarding this notification, please contact us at (800) 435-8957 or via email at mpc@moldedproducts.com.

Sincerely,
